Heejeong Nam

hazel-heejeong-nam.github.io

Research Interests

Representation learning, Generative Models, Causality

Education

Brown University (expected) 2025 ∼ 2027
Master of Science in Computer Science (Fulbright Graduate Student)

Yonsei University 2019 ∼ 2024
Bachelor of Science in Electrical and Electronic Engineering. Minor in Astronomy

University of California, Los Angeles 2022 ∼ 2022
Exchange Program, Electrical and Computer Engineering

Experiences

Boeing | Seoul, South Korea — Jan. 2024 ∼ Aug. 2025
Full-time employee, AI Researcher

Causality Lab | Seoul National University, South Korea — Jun. 2024 ∼ Jan. 2025
Research Collaborator

LinqAlpha | Massachusetts, United States (remote) — Sep. 2023 ∼ Dec. 2023
Internship, AI Researcher

AITRICS | Seoul, South Korea — Oct. 2022 ∼ Feb. 2023
Internship, AI Researcher

Vision Research Lab | UC Santa Barbara, United States — Jun. 2022 ∼ Sep. 2022
Internship, AI Researcher

Non-publication Projects

Accessibility Project (Realtime STT+T2TT) | **Boeing** — Mar. 2024 ∼ Aug. 2025

- Collaborated as one of three core developers—alongside the PI and the data scientist—serving as the primary AI engineer responsible for end-to-end model development.
- Highlighted at AIX 2025 [Articles] and AWG 2025, and the first Korean team featured in Boeing's public magazine.

Parts Sales Forecasting | **Boeing** — Jan. 2024 ∼ Aug. 2025

- Served as one of two core AI researchers driving the project development.
- Led the development of two customized internal time-series forecasting models, driving an overall performance improvement of approximately 20%.

Graph based Knowledge Editing in LLMs | **LinqAlpha** — Sep. 2023 ∼ Dec. 2023
(Advisor: Prof. Jy-Yong Sohn)

- Devised a test-time framework for editing LLM behavior by enforcing locality through demonstrations composed solely of target-relevant examples.
- Diagnosed reasoning weaknesses in state-of-the-art LLMs and augmented demonstrations with knowledge graph–derived context, significantly improving coverage and inference accuracy.

Brain CT Segmentation for NPH Prediction | **Vision Research Lab @ UCSB** — Jun. 2022 ∼ Sep. 2022
(Advisor: Prof. B.S. Manjunath)

- Assisted a real-time prediction project for Normal Pressure Hydrocephalus (NPH) on BisQue platform.
- Initiated a 5-class segmentation and a stable post-processing based on intensity difference that were introduced through morphology.

UCLA Timetable Recommender System | **UCLA** — Mar. 2022 ∼ Jun. 2022
(Advisor: Prof. Xiang "Anthony" Chen)

- Designed and implemented a web application that scrapes UCLA's course catalog and leverages TF–IDF similarity between a user's previous courses and course descriptions to generate personalized class recommendations.

Honors and Awards

Fulbright Scholarship — 2025
Awarded a prestigious U.S. government–funded program promoting academic and cultural exchange.

NeurIPS Conference Grant — 2023
Awarded full housing and registration fee support.

Jilli Scholarship — 2021
Awarded Yonsei University merit-based scholarship for academic excellence.

Yonsei Internal Scholarship — 2020
Awarded for outstanding leadership at Yonsei University.

Languages

Fluent in **English**: TOEFL IBT 114/120 (Nov. 2024)

Native in **Korean**
